Overview

Qulliq Energy Corporation (QEC) is wholly owned by the Government of Nunavut and operates in compliance with the *Qulliq Energy Corporation Act*. QEC generates and distributes electrical energy to Nunavummiut through the operation of 25 diesel generation plants in 25 communities. The corporation also provides mechanical, electrical and line maintenance, as well as support services, from three regional centres.

QEC supports the Minister responsible for Qulliq Energy Corporation on regulatory and intergovernmental issues, attends to corporate objectives provided by legislation, and has the mandate to coordinate all contracting, procurement and leasing activities to fulfil the operational requirements of the corporation.

QEC is pleased to present its annual report on contracting, procurement and leasing activities for the 2016-2017 fiscal year.

Procurement Objectives

QEC is committed to ensuring fair value and ethical practices in meeting its contracting, procurement and leasing responsibilities. This is accomplished through effective policies and procedures aimed at:

- Obtaining the best value for Nunavummiut;
- Creating a fair and open environment for vendors;
- Operating with integrity and transparency;
- Maintaining current and accurate information; and
- Ensuring effective approaches to meet QEC's operational requirements.

The corporation is presenting this document to support the integrity and transparency of its contracting, procurement and leasing activities. With the release of this information, QEC is bound legally to safeguard competitive information which may prove harmful if disclosed to the public.

QEC strives to fully comply with the reporting requirements of its contracting, leasing and procurement policies. The information in this report is obtained from procurement, leasing and operational records and is deemed to be accurate.

Readers should keep in mind that the information presented in this report is based upon contracting, purchasing and leasing records, and may differ from actual payment data.

Terminology

This listing is intended to assist the reader with definitions for QEC's technical procurement and contracting terms used in this report.

Goods: In this report, "Goods" refer to contracts for purchased goods that are primarily entered into by QEC using a purchase order.

Services: refer to contracts for the purchase of services and are primarily entered into by QEC using a service agreement or service contract.

Service Agreements: are considered contracts for the delivery of services other than the provision of goods and construction.

Contracts: in the QEC context, contracts are used primarily for the purchase of capital assets (assets acquired for construction projects and large scale installations) and are awarded by invitational or public tender.

Request for Tenders and Public Tenders (used interchangeably): are used when the anticipated cost will exceed \$125,000, QEC knows exactly what it is looking for, and it is seeking the best price to purchase that particular good or provide that specific service. It is a bidding process that is open to all qualified bidders, where the sealed bids are opened in public for scrutiny and are chosen on the basis of price and quality. Also called a competitive tender or open tender.

Invitational Tender: are those tenders for which tender documents are sent only to contractors or suppliers specifically selected to submit tenders.

Request for Proposal (RFP): is the process used to acquire goods or services when QEC knows what it needs as an end result, but not necessarily how best to achieve it. Therefore the corporation seeks proposals on methods, ability and price and can negotiate the best method to achieve the best value.

Invitational RFP: are those RFPs for which proposal documents are sent only to contractors or suppliers specifically selected to submit proposals.

Request for Quotes (RFQ): is the process used to obtain a price for a known commodity and is used primarily for the purchase of goods and services

Invitational RFQ (IRFQ): are those RFQs for which quote requests are sent only to specific suppliers.

Standing Offer Agreements (SOA): are price agreements between QEC and a supplier wherein the supplier agrees to provide, on demand, specified goods or services under specified conditions during a set period at a defined price or discount structure and were established through public competitive processes. QEC is also able to access all SOA's issued by and available to the GN.

Sole Source: A sole sourced contract or purchase is one in which the corporation believes, on reasonable grounds, that one of the following is applicable:

- i. The goods, services, or construction are urgently required and delay would be injurious to the public interest; or
- ii. Only one party is available and capable of performing the contract; or
- iii. The contract is an architectural or engineering contract that will not exceed \$25,000; or
- iv. Any other type of contract that will not exceed \$5,000 in value.

NNI Considerations

In the 2016-2017 fiscal year, no contracts administered by QEC were evaluated under the GN's Nunavummi Nangminiqaqtunik Ikajuuti (NNI) Policy. NNI adjustments provide an incentive to encourage Nunavut and Inuit owned businesses to respond to QEC contract proposals and tender opportunities. The corporation implemented the NNI Policy effective April 1, 2017.

Structure of this Report

This report is divided into five sections and summarizes all contract, procurement and leasing activities for the corporation for 2016-2017:

Section 1 Service Agreements

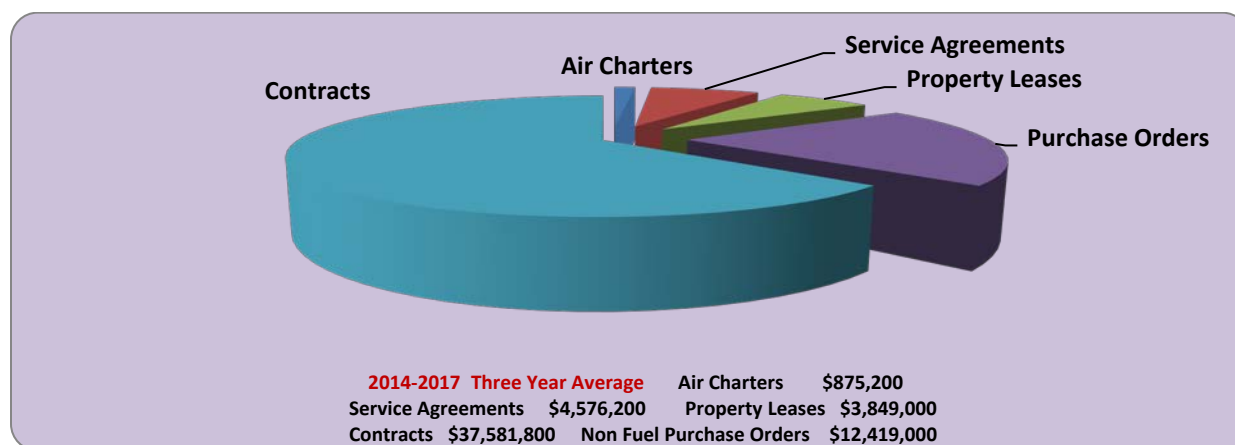

Section 2 Contracts

Section 3 Air Charters

Section 4 Purchase Orders

Section 5 Leases

Contracting, Leasing & Procurement –Three Year Average Comparison

Section 1 Service Agreements

Service agreements are normally used by QEC for the procurement of services other than the provision of goods and construction. In the 2016-2017 fiscal year, 78%* of service agreements were acquired through the tender or Request For Proposal (RFP) and Request For Quotes (RFQ) processes, as well as through Standing Offer Agreements (SOA) of the Government of Nunavut.

Large value Service Agreements in 2016-2017 included:

Design Bulk Fuel Storage Farm Upgrade - Iqaluit	Nunami Stantec Ltd.	\$ 255,929.00
Arc Flash Study and Hazard Analysis - Nunavut	CIMA & S.E.N.C.	264,970.00
G4 engine parts & labour - Cam Bay	Wajax Power Systems	271,832.35
Supply & erect Quonset steel structure - Naujaat	Northern Industrial Construction Ltd.	395,000.00
Supply & erect Quonset steel structure - Coral Harbour	Northern Industrial Construction Ltd.	395,000.00
G1 engine parts & labour - Cam Bay	Wajax Power Systems	403,925.78
Power Plant Condition Assessment - Nunavut	Mario Scerbo, Civil Engineer	449,873.00
Emergency repairs G5 - Rankin Inlet	Toromont	1,181,900.00

One service agreement was awarded with a value of \$1.18 M for emergency genset repairs at the power plant in Rankin Inlet. Service agreements are used primarily for maintenance type services and quite often are for multiple communities or regions.

Section 2 Contracts

Contracts are used primarily for the purchase of capital assets. These assets are acquired for project construction and large scale installations and are traditionally awarded by invitational and public tender.

The majority of contracts issued in 2016-2017 was of a value greater than \$100,000 and were primarily the result of work performed at a number of power plants. Of these contracts, \$15.9M was for the construction of the new plant in Grise Fiord and \$23.0M was for construction of the new plant in Cape Dorset. Major contracts were also issued for equipment replacement and installation at many of the plants. The data presented is for values at the time the contract was awarded. The award is a static value and may not reflect what was actually paid to a vendor throughout the multi-year life of a contract.

Large value contracts awarded in 2016-2017 included:

Emergency Unit Installation - Clyde River	Kudlik Construction Ltd.	\$ 246,800.00
Supply & Install Perimeter fencing - Naujaat	Inukshuk Construction Ltd.	249,000.00
Replace substation transformers, reclosers - Pond Inlet	Kudlik Construction Ltd.	267,800.00
Fuel Tank Cleaning & Inspection - Clyde River	V.W. Cochrane Consulting Corp.	272,112.00
Supply and Deliver Line Hardware - Sealift 2017	Anixter Power Solutions Canada	400,972.38
Supply and Delivery 500-550 kW Genset - Clyde River	Toromont Cat	417,890.42
Fuel Tank Replacement - Resolute Bay	Inukshuk Construction Ltd.	480,000.00
Genset Replacement - Kimmirut	NorthWest MetalBond	564,894.00
1100 kW genset install - Cambridge Bay	NorthWest MetalBond	760,105.00
Chars Modular Unit Installation - Cambridge Bay	NorthWest Metalbond	844,882.00
Fuel Storage Tank Replacement Upgrade - Arviat	Adco Power Ltd.	847,900.00
G2 Engine replacement - Gjoa Haven	Wajax Power Systems	908,750.00
Design Supply&Delivery Mod Emerg Unit - Repulse	Toromont Cat	1,798,786.00
500-550 kW Pre-Fabricated Modular Unit - Gjoa Haven	Toromont Cat	2,087,166.00
G3 Generator Set Replacement - Arviat	Universal Energy Resources	2,262,000.00
G1 Upgrade - Baker Lake	Universal Energy Resources	2,362,000.00
Design Build New Diesel Power Plant - Grise Fiord	EBC Inc.	15,897,508.00
RFP New Power Plant - Cape Dorset	Kudlik Construction Ltd.	22,972,000.00

Section 3 Air Charters

Air travel by QEC employees is typically provided by commercial airlines. It is the policy of QEC to only charter aircraft when more economical travel is unavailable or impractical. QEC charters aircraft to address urgent power plant repairs or to meet urgent operational requirements.

Air charters represent the smallest group of procurement activity for QEC. In 2015-2016, significant charter expenses were incurred to respond to a fire at the power plant in Pangnirtung and to transport equipment to Qikiqtarjuaq and Taloyoak in order to build new power plants. In 2016-2017 charter costs had dropped significantly.

Air Charters by Value

Section 4 Purchase Orders

QEC uses purchase orders to support payment for contracts, services, supplies and equipment, as well as fuel, for the corporation. Purchase orders account for a significant portion of procurement activity. The tables below summarize purchase orders valued at \$5,000 or more, including those issued for services rendered as a result of amendments to service or construction contracts. Purchase orders for fuel used in QEC's power plant operations account for approximately \$55 million each year.

Purchase Orders by Value

Section 5 Leases

The majority of QEC's leasing activity is for the purpose of employee accommodation. As shown in the following table, 95% of all leases are classed as residential. The tight housing market in Baker Lake and Iqaluit, as well as in the regional centres, has resulted in significant increases in housing costs and is a factor when leases are renegotiated.

The majority of leases have an annual value of less than \$50,000. The procurement of new leases and the renewal of existing leases are done by public invitation through QEC's Property Management division. Property developers that have space available are regularly surveyed for unit availability and pricing to meet QEC's ever evolving housing needs. Data reflects leases in place as of March 31, 2017. Leases expiring in the current year and reported in past year reports are not reported.
