Re: Chesterfield Inlet Marine Infrastructure.

Dear Mr. Savikataaq,

The Hamlet council of the Hamlet of Chesterfield Inlet at their regular meeting held on June 5, 2018 passed motion #116/18 directing that a letter be sent to you to address the marine infrastructure in Chesterfield Inlet.

The Hamlet Council is asking that you investigate funding sources to have a small craft harbour, boat launch, barge landing area, and a freight marshalling area developed for Chesterfield Inlet.

The current dock area is dangerous with people having to climb over large boulders, and it provides only limited access at high tides only. The floating dock has been damaged from hitting bottoms at low tide and high wave action on the dock and push out area. The Barge landing area is right by our Northern Store and when the barge is unloading the cargo is piled right on the parking lot, causing a very dangerous situation. (ᐃᓂᓴᓴ)

The Hamlet council and I look forward to your response to our request

Sincerely

Simeonie Sammurtok
Mayor, Chesterfield Inlet
