To whom it may concern:

This is about my health ever since I started working here at Sakku School January, 2011
I started having really bad Sinuses and allergies.
My migraine has been more frequent and my eyes are very sensitive to the lights.
I know these Symptoms are cause by mold; something has to be dealt with this problem at Sakku
School.

My foster kids are having really bad skin irritation one of them even had to go on medication because
his skin problem was spreading around his neck.

Thank you for your time.

Geraldine Stanley.

11 Signs of a Mold Illness

1. Brain Fog, Memory Problems, Trouble Focusing, Headaches
2. Fatigue and Weakness
3. Unexplained Muscle Cramping, Aches and Pains in the Joints, Persistent Nerve Pain
4. Numbness and Tingling
5. Eye Problems like Red Eyes or Light Sensitivity
6. Asthma and Sinus Problems like Cough or Shortness of Breath
7. Tremors and Vertigo
8. Digestive Issues like Change in Appetite, Diarrhea, Nausea, Abdominal Pain
9. Metallic Taste in the Mouth
10. Temperature Regulation or Night Sweats
11. Excessive Thirst and Increased Urination

You can see the variety of symptoms are quite large and can overlap with other conditions. See a practitioner if you have the underlying conditions that may go along with mold and mold toxicity. It's not always the food we eat, but it can be the air that we breathe that makes us sick.

Dear DEA:

I am a grandmother to Colton Ell who is a grade 4 student at Sakku School. Colton's skin has flared up with eczema again. He has been fine all summer and as soon as school resume for the year, he is complaining and scratching his skin due to the eczema that has come up again.

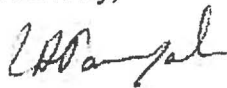

Ever since he started attending Sakku School at age 5, he develop red inflamed skin, they become rough scaly patches and ooze. They become very painful for him as well. During Christmas and summer breaks the inflammation heals but leaves a bad scarring on his skin.

There have been numerous complaints on Facebook about kids developing eczema and or headaches as they smell a very bad odour at the school. It's Mold they smell!! Also, many substitute teachers commenting that they go home with a bad headache.

I know that getting a new school is still in the process and may take the Government of Nunavut a long time to approve the request. So, in the meantime, I would suggest that all classroom carpets be removed and every room disinfected on a weekly basis.

Please do something about the matter as soon as possible before it becomes a terminal illness!

Sincerely,

Rosie Tanuyak-Ell
Concern Grandmother!

DEA COMMITTEE

I am writing on behalf of my concern for Allie Ruby Ningeocheak and Andrew John Ningeocheak

Andrew John Ningecheak 7 years old,grade 3. home room teacher Sanaaq Pee.

Andrew have a long history of recurring eczema , he has been complaining about having hard time breathing In his class room and having skin reactions on his body

I have looked in to what would be causing the reaction but apparently I have notice most times when He comes home from school and when his reaction is active,the skin flair ups that requires medical attention are serious.

Andrew had been absent too many times since beginning of school year and over the years due to the smell of mold.

DEA committee

Ruby Allie Ningeocheak 10 years old, grade 6

Home room teacher Nicola

Ruby has been complaining about having head aches in her class room

Allie Ruby's been coming home from school continuously saying she can smell the mold in the hall way

And in the washroom.

DEA committee on behalf of my concern the smell of the mold in Sakku School is health hazard

and is effecting Allie Ruby the ability to stay active and work in school.
