

Return to Written Question

Asked by: Adam Arreak Lightstone

Asked of: Honourable Lorne Kusugak

Number: 60-5(2)

Date: February 24, 2020

**Subject: Use of Contract Services to Perform Functions
Intended for Indeterminate Employees in 2016-17**

Below are the responses to your written questions posed on February 24, 2020. We have answered your questions to the best of our ability given the level of detail you have asked for and the current limitations and pressures due to COVID-19.

As I noted during the Committee of the Whole (COW), the information that you have based your questions on predates my time as the Minister of Community and Government Services (CGS). Since I became Minister in November 2017, I have provided direction to my Deputy Minister to address many of the issues that you have raised. Therefore, many of the issues you have raised are either no longer valid or are being addressed through proactive measures to reduce the reliance of the Government of Nunavut on contracted IMIT resources.

For example, as you can see from the table below, the number of contractors utilized each year by CGS for IMIT has decreased since I have become Minister. This information either has been or will be reported in future Procurement Activity Reports (PAR):

	2016-17	2017-18	2018-19	2019-20
# of contracts	63	105	65	46
# of people	43	43	34	33*

*As four of these resources were assigned to assist with recovery efforts from Ransomware, this number would have been 29 and not 33, which represents a decrease of 33% since I became the Minister late in 2017-18.

I have also directed my team to undertake the following strategic initiatives that will help to ensure that the Territory has the best IMIT support possible given the challenges that all governments have in recruiting and retaining people with this skill set:

- HR Initiatives:

The IMIT department has made significant efforts in recent years to advertise and recruit positions and has initiated 60 hiring processes since 2018. Some of the reasons that most of these competitions have been unsuccessful include:

- *High Demand, Low Supply* – Many IMIT positions are specialized and require high levels of education, formal training, and years of experience. These resources are in high demand throughout Canada and the world. Highly qualified and skilled IMIT professionals are in short supply and positions are difficult to fill.
- *Competitive Salaries* – Because IMIT professionals are in short supply, they can demand a high level of compensation. Many jurisdictions supplement the salaries of their IMIT professionals as an incentive, much like we do for nurses. As the Government of Nunavut does not undertake this practice for IMIT professionals, we must often rely on consultants.
- *Misunderstood* – There appears to be a misunderstanding about the types of resources required in some of the IMIT positions you have inquired about. These positions often require someone with more than a community college diploma and/or university degree – they also need many years of experience and additional certifications. As such, it is important to stress that the use of IMIT contractors does not take jobs away from Nunavummiut. If the skill set required to fill these roles was available in the Territory, contract resources would not be required. To suggest that using contractors from the South for IMIT positions takes jobs away from Nunavummiut is like suggesting that hiring Doctors from the South takes jobs away from Nunavummiut.
- *Long-Term Vacancies* – There is a total of 13 positions that have been vacant for longer than 2 ½ years, all of which are specialized. The area of expertise required for these positions is specific, advanced, and in demand throughout Canada. The 13 positions that have been vacant for more than 2 ½ years include:

- Project Manager, Operations
- Senior Technical Special Lead (Applications)
- Manager Solutions Delivery
- Technical Architect – Systems
- Technical Architect – Networks
- Security Analyst
- Application Analyst
- Desktop Analyst
- Network Analyst
- Systems Analyst
- Technical Specialist (Telephony)
- Senior Internet Working and Security Specialist
- Informatics Technician (Baker Lake)

Additional measures being undertaken to staff as many IMIT positions with as much local talent as possible include the recent development of a CGS-specific Inuit Internship Program. Through this new program, three internship positions have been dedicated to IMIT to bring in entry-level staff and develop their skills over time. CGS has also prioritized the Direct Appointment process for Inuit employees throughout the department, including IMIT.

- Due Diligence in the Procurement Process:

As Minister, I have been clear about the need for the IMIT branch to be diligent about following procurement requirements and I can assure you that my staff who work in procurement are dedicated to ensuring that the rules are followed. IMIT contracts are the result of invitational competitive processes where all vendors on the SOA list are invited to respond to our needs.

- RFP with Gartner:

As noted during COW, I have asked my staff to seek independent, objective advice about how to optimize IMIT delivery in the Territory, including the best way to resource that work. As such, we have entered into a contract with Gartner to help us identify options that include the optimal number of contract resources required to perform the work.

- Nunavut Arctic College (NAC) Technician Diploma Program:

CGS has been working closely with NAC to fund and deliver a program that will begin again in fall 2020. This program allows the GN to train and employ local Nunavummiut in some of the positions required in IMIT (CGS currently has six graduates of the program working in the department).

While the program is a good start to ensure that there are more opportunities for beneficiaries to qualify for entry-level technical and professional positions, it should be emphasized that it is a feeder program that is good for some GN IMIT positions, but not all. It is anticipated that the entry-level NAC program will eventually lead to a program that offers the kind of advanced training that students would need to work in senior IMIT positions.

Note that my departmental officials are available to meet you in person to discuss the progress we are making and will be happy to answer any remaining questions you have. At that time, they would be happy to hear your analysis of the information you have been provided so far and if you have specific ideas about how we can continue to improve. It is important to me for everyone to have a good understanding of the Government of Nunavut's IMIT function so that Nunavummiut are not confused by any inaccurate or ill-informed statements that may be made in the Legislative Assembly on the topic.

Question (1):

Figure 1 below shows a sample listing of contracts from the 2016-2017 procurement activity report. Please provide the following for each:

- a. The start date of the contract (some of the previous dates were not provided or were later than the end date)
- b. The end date of the contract
- c. Scope of work
- d. Description of Task
- e. Identify whether work is a One-time project, multiyear project or ongoing task
- f. Estimated number of days to complete work
- g. Daily rate
- h. Per diem costs
- i. Accommodation information (staff housing, other leased unit or hotel) and cost, and if applicable any recoveries
- j. Number of flights and costs associated
- k. Any other relevant factors in determining the estimate
- l. Total estimated price
- m. Name of subcontract resource
- n. Actual number of days to complete work
- o. Breakdown of total actual cost
- p. Portion (days) of work done in Nunavut
- q. Portion (days) of work done outside of Nunavut
- r. Identify if a contract is renewed/ reposted/ extended because the contractor was unable to complete the specified task with the specified time

Response (1):

See Appendix 1 - Question 1-16-17-21APR2020

Question (2):

For the positions listed below (i-xx) provide the following:

- a. When was the last time the position or a **similar function** was sent to Job Evaluation for review?
- b. When was the last time the position or a **similar function** was sent to Recruitment and Staffing for advertisement?
- c. What is the current, or most recent, job evaluation?
 - i. Senior Business Systems Analyst
 - ii. Senior Data Communications Administrator
 - iii. Senior Database Administrator

- iv. Senior Delivery Systems Engineer
- v. Senior Enterprise Architect
- vi. Senior Network Engineer
- vii. Senior Project Manager
- viii. Senior Sharepoint Developer
- ix. Senior Sharepoint Developer Architect
- x. Senior System Administrator
- xi. Business Systems Analyst
- xii. IT Project Manager
- xiii. Project Manager
- xiv. Senior Business Analyst
- xv. Senior Business Analyst/ Project Manager
- xvi. Senior Data Communications Engineer
- xvii. Senior Information Technician Project Manager
- xviii. Senior Project Manager/ Business Analyst
- xix. Senior System/ Network Engineer
- xx. Senior Technical Project Manager

Response (2):

See appendix 2

Question (3):

For the contracts listed below, provide rationale for not having the work completed internally.

- a. Monitor and review cash flow budgets
- b. Review and update job descriptions

Response (3):

The services of contract resources may be accessed in instances where the;

- a) Services are highly specialized, and the Department does not have internal capacity to complete (e.g. functions are not part of an existing job description)
- b) Contribution of an external party will enhance the outcome of the project (e.g. providing additional expertise or objectivity)
- c) Nature of the work requires dedicated resources to achieve the necessary outcomes in the required timeframe

Question (4):

Please provide a list of all 79 positions in the Informatics Planning Branch as of March 31, 2017, by program (CIO, Director, Manager Solutions Delivery, 10 positions under Manager Solutions Delivery, Manager Informatics Projects, 6 positions under Manager Informatics Projects ...).

- a) Provide employment status for each position as of March 31, 2017 including whether the position was filled by an indeterminate employee, term employee, casual employee, contractor or was vacant. If necessary, include casuals and contractors in unfunded positions.
- b) For the contracts under the SOA that are "for skill sets that did not exist within the fulltime positions on the organizational chart. The requirement to meet operational needs was beyond the current available skillset, timelines and staffing complement in the teams that made up the organizational chart." Please indicate where those positions/functions would be ideally placed within the organization.

Response (4):

- A) See attached - Appendix 3 that list all positions for the Informatics Planning Branch as of March 31, 2017. These are attached as individual files for ease of viewing
- B) See Appendix 4

Question (5):

In the return to written question 27-5(2) the Minister stated in response 2-g "In relation to our unfilled positions, the Department was going through a reorganization that significantly impacted the ability to hire new staff until the organizational review was completed and processed." When did this reorganization begin and end?

Response (5):

The reorganization began in fiscal year 2014-15 and continued through fiscal year 2016-17.

Question (6):

In the return to written question 27-5(2) the Minister stated in response included the organization chart of fiscal year 2016-17. A number of the positions in the chart did not have a position number and were instead identified at "14-NEW" does this mean that the positions has yet to be sent Job Evaluation/ Recruitment and Staffing/or Human Resources Information Systems to be created and entered into the HR system?

Response (6):

14-NEW is used as a place holder for the creation of org charts that will be used to identify the new structure when submitting a request to cabinet for new indeterminate positions. After cabinet approves the positions job evaluation would do a final review and assign a position number after that point they would be entered into the HR system.

Question (7):

In the return to written question 27-5(2) the Minister stated in response 2-h "The team needed access to senior specialists with more than 10 years of experience in managing large enterprise environments. The certifications required to perform these tasks are extensive and not currently available in Nunavut and CGS had to continue to provide the services required and expected by client departments." How many of the subcontractors provided by the vendors had previously been employees of Community and Government Services?

Response (7):

There were 2 subcontractors previously employed with Community and Government Services in 2016/17. However at this time there are currently no previous employees in a contract role working for the Information Management & Information Technology division.

Question (8):

In the response to written question 27-5(2) the Minister stated "In regards to the reporting structure of contractors, a Standing Offer Agreement (SOA) with the GN establishes a list of pre-approved contractors (individual consulting companies) to provide services in the respective categories and related topics as outlined within the individual RFP's. A SOA is not a contract. It is an agreement between the GN and a supplier, wherein the supplier agrees to provide to the GN, on demand, specified goods and services under set terms and conditions at pre-arranged prices for a specified

time period. The contracts that the GN creates as part of the call-up process under an SOA is with specific vendors and not with the individual resources that would be performing the work. The GN has no contractual relationship with the contracted resources and does not provide any disciplinary or performance management functions to those resources. The companies that are on the SOA have separate contracts with the individual resources and the resources report to them and not to the GN."

- a. Does the call up process include reviewing resumes, and having the subcontractor take part in an interview process?
- b. Do subcontractors receive performance related meetings with CGS staff?
- c. Are subcontractors required fill out timesheets similar to casuals, and submit them to CGS staff ?

Response (8):

- A) Yes, the call up process include reviewing resumes, and having the subcontractor take part in an interview
- B) No, subcontractors do not receive performance related meetings with CGS Staff
- C) Yes, subcontractors are required to fill out timesheets on a monthly basis (not bi-weekly like casual employees). We use these timesheets for the purpose of tracking hours worked for managing budgets

Question (9):

How many times has a SOA contract estimate been in excess of the \$250,000 threshold, which would require the contract to go through the RFP process?

Response (9):

There were no times that an SOA estimate during 2016-17 was in excess of \$250,000.

Question (10):

In the return to written question 27-5(2) the Minister's response indicated that almost all of the contracts are for six months or less, is this to ensure that the contract is below the \$250,000 RFP threshold?

Response (10):

- IMIT had set-up a schedule where-by the operational requirements were revisited every 6 months to achieve the following:
 - Review the needs of IMIT
 - Review project progress to assess future needs in the short term (next 6 months)
 - Compare the needs of IMIT with the results of Hiring Processes success or not

Question (11):

Are multiple SOA contracts being used for the same project to ensure it remains below the \$250,000 RFP threshold?

Response (11):

No, they are not. Contracts are done as per the response identified for Question 10

Question (12):

When a contractor is unable to complete the specified task within the timeframe of the contract is there a consequence, if so what are they?

Response (12):

That depends on the reason the task wasn't able to be completed.

Appendix 1
Question #1: 2016-2017

Line #	1
(A) Start Date	July 1,2016
(B) End Date	September 30,2016
(C) Scope of work	System and SharePoint configuration and administration
(D) Description of Task	<p>-Provide a high level of experience in Microsoft Windows network design, planning, implementation and administration especially related to Microsoft Windows Active Directory 2003 (or newer versions). It will also include additional options and features within Microsoft Window Servers such as terminal server, file, print management, utilities etc.□</p> <p>-Install, administer, maintain, and monitor network servers and third party hardware in the GN production network environment. Have experience in designing and administering VMware and Microsoft Virtual Servers.□</p> <p>-Install, administer, maintain and monitor applications and programs including Microsoft Enterprise/Standard Server 2003 (and newer versions), Microsoft Exchange server 2010 (and newer versions), Microsoft Sharepoint, Microsoft System center and Microsoft/Citrix Terminal server in the GN production network environment. □</p> <p>-Install, administer, maintain and monitor various network applications and programs including Computer Associates Brightstor Backup software or other backup solutions, Symantec anti-virus central server and spam software and all printing software in the GN production network environment.□</p>
(E) One time, Multi-Year, On-Going	Unique contract completed with vendor. Contract did not have an extension.
(F) Estimate Number of Days to complete work	90
(G) Daily Rate	\$ 1,090.00
(H) PreDiem Cost	\$ 80.00
(I) Accommodations	\$ 115.00
(J) Number of Flights and Cost	1 Flight-\$2000.00
(K) Other Relevant Factors	
(L) Award Value	\$ 115,650.00
(M) Project Name	Senior Network Engineer
(M) Vendor	Sundiata White Group Inc.
(N) Actual Number of Days to Complete work	20.7
(O) Breakdown of total Actual Cost	\$ 28,618.11
(P) Portion of days of work done in Nunavut	100%
(Q) Portion of Days Done Outside of Nunavut	0%
(R) Contract Renewed/Posted/Extended because contractor could not complete work	Unique contract completed with vendor. Contract did not have an extension.

<i>(R) Contract Renewed/Posted/Extended because contractor could not complete work</i>	Unique contract completed with vendor. Contract did not have an extension.

Appendix 1
Question #1: 2016-2017

Line #	22
(A) Start Date	April 1,2016
(B) End Date	September 30,2016
(C) Scope of work	<ul style="list-style-type: none"> •Analyze all existing infrastructures and have a clear understanding of operational support processes and procedures for data centre services, application systems, telecommunications and related network technologies.
(D) Description of Task	<ul style="list-style-type: none"> •Provides major direction in Network design, planning and implementation for the GN's WAN/MAN/LAN/video environments specifically related to the existing service provider contracts and related infrastructure as well as major infrastructure upgrade initiatives sponsored by the CCIO office. □ •Analyzes GN departmental IT requirements and current projects to develop enterprise based designs and re-engineering solutions relating to GN infrastructures. □ •Analyzes departmental budgets and project cost allocations relating to enterprise project implementation plans, procurements and resource deployments. □ •Creates network designs, financial analyses and architectural frameworks for major projects and business case initiatives. □ •Contributes to the development of major procurement initiatives to secure products and services specific to GN enterprise infrastructure initiatives. □ •Develops and manages vendor relationships relating to major project infrastructure upgrades. □ •Acts as a project authority for technical implementations and deployments relating to enterprise GN infrastructure initiatives. □
(E) One time, Multi-Year, On-Going	Unique contract completed with vendor. Contract did not have an extension.
(F) Estimate Number of Days to complete work	150
(G) Daily Rate	\$ 875.00
(H) PreDiem Cost	\$ -
(I) Accommodations	\$ -
(J) Number of Flights and Cost	1 Flight-\$2000.00
(K) Other Relevant Factors	
(L) Award Value	\$ 175,000.00
(M) Project Name	Senior Enterprise Architect
(M) Vendor	Donna Cona
(N) Actual Number of Days to Complete work	130.4
(O) Breakdown of total Actual Cost	\$ 116,081.50
(P) Portion of days of work done in Nunavut	10%
(Q) Portion of Days Done Outside of Nunavut	90% %
(R) Contract Renewed/Posted/Extended because contractor could not complete work	Unique contract completed with vendor. Contract did not have an extension.

04423	Divisional Administrative Coordinator	Indeterminate	Active	CGS Informatics Planning & Services, Iqaluit	Iqaluit
04427	Informatics Technician	Indeterminate	Active	CGS Informatics Planning & Services, Qikiqtaaluk	Igloolik
04536	Informatics Technician	Indeterminate	Active	CGS Informatics Planning & Services, Qikiqtaaluk	Pangnirtung
04538	Informatics Technician	Indeterminate	Active	CGS Informatics Planning & Services, Qikiqtaaluk	Pond Inlet
04852	Records Analyst	Indeterminate	Active	CGS Informatics Planning & Services, Iqaluit	Iqaluit
04875	Project Manager Operations	Indeterminate	Active	CGS Informatics Planning & Services, Iqaluit	Iqaluit
04877	Project Manager	Indeterminate	Active	CGS Informatics Planning & Services, Iqaluit	Iqaluit
09991	Manager Records Management	Indeterminate	Active	CGS Informatics Planning & Services, Iqaluit	Iqaluit
09994	Corporate Chief Information Officer	Indeterminate	Active	CGS Informatics Planning & Services, Iqaluit	Iqaluit
10021	Manager Informatics Operations	Indeterminate	Active	CGS Informatics Planning & Services, Iqaluit	Iqaluit
10026	Desk Side Support Supervisor	Indeterminate	Active	CGS Informatics Planning & Services, Iqaluit	Iqaluit
10027	Senior Informatics Technician (Systems)	Indeterminate	Active	CGS Informatics Planning & Services, Iqaluit	Iqaluit
10028	Intermediate Informatics Technician (Telecoms)	Indeterminate	Active	CGS Informatics Planning & Services, Iqaluit	Iqaluit
10029	Informatics Technician Web Services	Indeterminate	Active	CGS Informatics Planning & Services, Iqaluit	Iqaluit
10038	Senior Technical Specialist Data	Indeterminate	Active	CGS Informatics Planning & Services, Iqaluit	Iqaluit
10040	Senior Technical Specialist (Data Lead)	Indeterminate	Active	CGS Informatics Planning & Services, Iqaluit	Iqaluit

10129	Call Center Agent	Term	Active	CGS Informatics Planning & Services, Iqaluit	Iqaluit
10132	Intermediate Informatics Tech (Systems)	Indeterminate	Active	CGS Informatics Planning & Services, Iqaluit	Iqaluit
10134	Senior Technical Specialist Lead (Telecommuniation	Indeterminate	Active	CGS Informatics Planning & Services, Iqaluit	Iqaluit
10483	Business Analyst	Indeterminate	Active	CGS Informatics Planning & Services, Iqaluit	Iqaluit
10490	Manager Information Evaluation	Indeterminate	Active	CGS Informatics Planning & Services, Iqaluit	Iqaluit
11532	Call Center Supervisor	Indeterminate	Active	CGS Informatics Planning & Services, Iqaluit	Iqaluit
13539	Director, Government Information and Planning	Indeterminate	Active	CGS Informatics Planning & Services, Iqaluit	Iqaluit
13540	Director, Information & Communications Technology	Indeterminate	Active	CGS Informatics Planning & Services, Iqaluit	Iqaluit
13557	Corporate Informatics Administrator	Indeterminate	Active	CGS Informatics Planning & Services, Iqaluit	Iqaluit
13928	Desk Side Support Officer	Indeterminate	Active	CGS Informatics Planning & Services, Iqaluit	Iqaluit
13929	Desk Side Support Officer	Indeterminate	Active	CGS Informatics Planning & Services, Iqaluit	Iqaluit
13931	Call Center Agent	Indeterminate	Active	CGS Informatics Planning & Services, Iqaluit	Iqaluit
13932	Call Center Agent	Indeterminate	Active	CGS Informatics Planning & Services, Iqaluit	Iqaluit
14015	Service Desk Asset Management Officer	Indeterminate	Active	CGS Informatics Planning & Services, Iqaluit	Iqaluit
03002	Informatics Technician	Indeterminate	Active	CGS Kivalliq Region	Arviat
03006	Informatics Technician	Indeterminate	Active	CGS Kivalliq Region	Rankin Inlet
03019	Informatics Technician	Indeterminate	Active	CGS Kitikmeot Region	Kugluktuk
03021	Informatics Technician	Indeterminate	Active	CGS Kitikmeot Region	Cambridge Bay
03057	Manager, Informatics Operations	Indeterminate	Active	CGS Kitikmeot Region	Cambridge Bay
03061	Manager, Informatics Ops	Indeterminate	Active	CGS Kivalliq Region	Rankin Inlet
03636	Informatics Technician	Indeterminate	Active	CGS Kitikmeot Region	Cambridge Bay
03732	Informatics Technician	Indeterminate	Active	CGS Kivalliq Region	Rankin Inlet
03733	Informatics Technician	Indeterminate	Active	CGS Kivalliq Region	Baker Lake
10060	Senior Informatics Tech Kitikmeot	Indeterminate	Active	CGS Kitikmeot Region	Cambridge Bay
13930	Informatics Technician	Indeterminate	Active	CGS Kitikmeot Region	Cambridge Bay

Appendix 4

Contract Resource Title	Reporting Position on Organizational Chart
Senior Network Engineer	Manager Networks Operations
Senior Data Communications Engineer	Manager Networks Operations
Senior Project Manager	Manager Informatics Projects
Senior System-Network Engineer	Manager, Solutions Delivery
IT Project Manager	Manager Informatics Projects
Business Systems Analyst	Manager Informatics Projects
Senior Network Engineer	Manager, Solutions Delivery
Senior Data Communications Engineer	Manager, Solutions Delivery
Senior Sharepoint Developer/Architect	Manager, Solutions Delivery
Senior Business Systems Analyst	Manager Informatics Projects
Senior Project Manager	Manager Informatics Projects
Senior Project Manager	Manager Informatics Projects
Solutions Delivery-Systems Engineer	Manager, Solutions Delivery
Senior Technical Project Manager	Manager Informatics Projects
Senior Project Manager	Manager Informatics Projects
Senior Project Manager	Manager Informatics Projects
Senior Project Manager	Manager Informatics Projects
Senior Project Manager/BA	Manager Informatics Projects
Senior Enterprise Architect	Director, Government Information & Planning
Senior Enterprise Architect	Director, Government Information & Planning
Senior Project Manager	Manager Informatics Projects
Business Systems Analyst	Manager Informatics Projects
Senior Data Communications Engineer	Manager Networks Operations
Senior Business Analyst	Manager Informatics Projects
Senior Network Engineer	Manager, Solutions Delivery
Senior Database Administrator	Manager Systems Operations
Senior Project Manager	Manager Informatics Projects
Senior Project Manager	Manager Informatics Projects
Business Systems Analyst	Manager Informatics Projects
Senior Enterprise Architect	Director, Government Information & Planning
Senior Project Manager	Manager Informatics Projects
Senior Network Engineer	Manager Informatics Projects
Senior Data Communications Admin	Manager Networks Operations
Senior Business Systems Analyst	Manager Informatics Projects
Senior Ststem/Network Engineer	Manager Systems Operations
Senior Data Communications Engineer	Manager, Solutions Delivery
Senior Project Manager/BA	Manager Informatics Projects
Senior Sharepoint Developer	Manager Informatics Projects
Senior Sharepoint Developer	Manager Informatics Projects
Senior Database Administrator	Manager Systems Operations
